
Applicant Name

St. Elizabeth Healthcare
Infectious Diseases

Minimum Requirements

Degree required: MD or DO

Successful completion of ACGME or AOA approved residency training program in Internal Medicine.

Successful completion of an approved fellowship program in infectious diseases including 12 months of specific clinical training.

Note: Members who first apply for membership after March 2, 2009 must be and remain (with a lapse of no longer than one year) board certified in internal medicine or become and remain (with a lapse of no longer than one year) board certified within six years of completion of their post-graduate medical training. Only those boards recognized by the American Board of Medical Specialties or the American Osteopathic Association are acceptable. This board certification requirement does not apply to applicants who on March 2, 2009 were members in good standing on the medical staff of the St. Luke Hospitals or St. Elizabeth Medical Center.

Privileges Requested

I. Core Privileges: Core privileges in hematology/medical oncology include the care, treatment or services listed immediately below. I specifically acknowledge that board certification alone does not necessarily qualify me to perform all core privileges or assure competence in all clinical areas. By signing this request, I believe that my specific training, experience and current competence qualifies me to perform each privilege that I have requested by checking in the spaces below. Please line through and initial any specific privileges within a checked privilege group that you are not requesting.

<u>Request</u>	<u>Description of Privilege</u>
_____	Moderate Sedation (requires proof of (a) board certification in Anesthesiology, Cardiology, Critical Care, Pulmonology or Emergency Medicine <i>or</i> (b) current ACLS Certification <i>or</i> (c) satisfactory completion of the ASA Moderate Sedation course
_____	Admit patients; perform histories and physicals; and evaluate, diagnose, consult and provide care to patients with acute and chronic infectious or suspected infectious or immunologic diseases, underlying diseases that predispose to unusual severe infections. Procedures include microscopic evaluation of diagnostic specimens including preparation, staining and interpretation; administration of antimicrobial and biological

products via all routes; aspiration of superficial abscesses; and lumbar puncture.
