Measuring your recovery and improvement

Many people in your situation have received similar care to improve their quality of life. Before you know it, you will be back to doing the things you love.

As one part of your provider's evaluation of your recovery after surgery, we will have you complete several online assessments at various times throughout your recovery process. These assessments are a set of statistically validated questions that are designed to track both your physical recovery, as well as the improvement to the overall quality of your life. While some of the questions may not seem directly relevant to your specific situation, they are part of a national framework that allows us to evaluate your recovery and measure improvements in your overall quality of life.

There are no right or wrong answers, but it is important that you answer each question to the best of your ability. You can expect each assessment to take about 10 minutes to complete.

You can take the assessment from home, on any device.

SAMPLE QUESTION

What amount of pain have you experienced when going up or down stairs?

☐ None ☐ Mild ☐ Moderate ☐ Severe

Note:

These assessments are required for Medicare patients and reported to the federal government.

Next Steps

Check your email or text messages

A member of our Outcome Team will contact you by email or text message a few days before you are scheduled to take the first assessment to provide you with all the information you need. The email will come from the following email address:
noreply-orthopaedicinstitute@patientoutcomes.com.

Complete assessment

It is important that you complete each assessment within a few days of being contacted. This allows your care team to have all the information needed to provide you with the best care possible.

Questions?
