## St. Elizabeth Healthcare Available Entry Points for Patients/Visitors

The available entry points for patients/visitors at each hospital location are listed below. If any entry point is not listed, then it is closed. **As a reminder, NO VISITORS will be admitted into any clinical setting, unless:**

- A single designated partner or primary caretaker for mothers delivering babies.
  - No visitors under age 14, which includes siblings of a newborn.
- End-of-life situations.
  - Patients are limited to one visitor at a time.
  - No visitors under age 14.
  - Visitors are not permitted to see patients if they exhibit any respiratory illness symptoms (coughing, sneezing, runny nose, fever, etc.)
  - Visitors are not permitted if they have traveled internationally within the past 14 days.
- In addition, individuals coming to one of our St. Elizabeth ambulatory outpatient centers or physician offices will be restricted to a single visitor responsible for transportation, and if that person is not needed for communication purposes, they should remain in their vehicle while we care for the patient. Please bring a mobile phone to support communication. Ambulatory practices and administrative buildings are also no longer allowing clinical student rotations, pharmaceutical representatives, and other outside vendors onsite through April 30.

We recognize that these restrictions can be disappointing to our patients and visitors, and we apologize for any inconvenience this may cause you or your family. The health and safety of you, our patients and care team are our top priority during this heightened time of illness.

We encourage you to use FaceTime, Skype and phone calls to visit with loved ones in the hospital. Should you need assistance with this, please let a staff member know.
