Dr. Ross Sullivan received his medical degree at Upstate Medical University and continued with his residency in Emergency Medicine. He completed a fellowship in Toxicology. Dr. Sullivan is the Fellowship Director of Medical Toxicology at Upstate Medical University. He is an Assistant Professor of Emergency Medicine and directs the SUNY Upstate Opioid Bridge Clinic. He is a board-certified physician in Emergency Medicine, Medical Toxicology and Addiction Medicine. He is also the Medical Director at Helio Health in Syracuse, NY.

Dr. Andrew A Herring graduated from Harvard Medical School and completed residency in emergency medicine at Highland Hospital—Alameda Health System in Oakland, CA where he continues as an attending emergency physician and Associate Director of Research. Dr. Herring is Medical Director of the Highland Hospital Substance Use Disorder Treatment Program and attending physician at the Highland Hospital Interdisciplinary Pain Medicine Program. Dr. Herring is the Principle Investigator of the California ED-BRIDGE | Emergency Buprenorphine Treatment Project. Dr. Herring is an Assistant Clinical Professor at the University of California, San Francisco and conducted health policy research as a Fulbright Scholar in Central America. His current research focuses on emergency department treatment of opioid use disorders and pain management. Dr. Herring is board-certified in Emergency Medicine, Addiction Medicine, and is a candidate of the American Board of Pain Medicine.
