

YOUTH AND THE E-CIGARETTE EPIDEMIC

**A new crisis is impacting our youth
right before your eyes.**

Schedule a time for our program today!

St. Elizabeth Healthcare has developed a unique and informative presentation focused on the growing issue of e-cigarettes, such as vapes and Juuls, as well as traditional tobacco products. We bring this program at no charge to local schools and other community locations for audiences including students, parents, teachers, school administrators and any others interested in this topic. Presentations may be customized to specific needs of the audience, setting and age groups, and can be as brief as 15 minutes, or more in-depth up to 45 minutes to an hour.
