

HeartSaver First Aid CPR AED

What does this course teach?

- First aid basics
- Medical emergencies
- Injury emergencies
- Environmental emergencies
- Adult CPR and AED use
- Child CPR AED and Infant CPR
- Opioid-associated life-threatening emergencies
- Illness and injury prevention

The AHA's Heartsaver® First Aid CPR AED course trains participants with little to no medical training to provide first aid, CPR, and use an automated external defibrillator (AED) in a safe, timely, and effective manner. Heartsaver® curriculums reflect science and education from the *American Heart Association Guidelines Update for CPR and Emergency Cardiovascular Care (ECC)*.

Description

Heartsaver® First Aid CPR AED provides students the highest quality training in the lifesaving skills of first aid, CPR, and use of an AED. This course empowers students to act with confidence in the event of an emergency at work, home, or in the community. Students who successfully complete the online course and skills session, will receive a Heartsaver® First Aid CPR AED Course Completion card, valid for two years.

Heartsaver® First Aid CPR AED is available in two different training methods – blended learning and classroom training. Both Heartsaver® First Aid CPR AED course options teach the same AHA science-based skills and result in the same AHA Course Completion Card.

- **Blended Learning** – Students complete online HeartSaver learning modules followed by hands on skills session. Students must complete hands-on skills session with an AHA Instructor to complete certification.
- **Traditional Classroom** – This certification course is Instructor Led with a practice-while-watching AHA video format that includes focused skills learning and assessments throughout the program.

Blended Learning Heartsaver First Aid CPR AED Certification Course

Heartsaver® First Aid CPR AED. This course includes adult, child and infant CPR as well as first aid. The Basic CPR AED course is a modular program that teaches lay rescuers how to recognize and treat life-threatening emergencies. This class focuses on the adult, child and infant victim and the use of the Automated External Defibrillator (AED). The Basic First Aid course is designed for the lay rescuer responding to emergency situations in the workplace, home and community. The course utilizes four core modules: 1) General Principles 2) Medical Emergencies 3) Injury Emergencies 4) Environmental Emergencies. The modules contain information for lay rescuers on how to manage illness and injuries in the first few minutes until professional help arrives.
