

“A growing body of scientific evidence demonstrates that the psychological and social problems created or exacerbated by cancer (e.g., depression, other emotional problems, or a lack of information or skills needed to manage illness) can be effectively addressed by a number of services and interventions.” *Institute of Medicine*

Judith McAuliffe, MA, PCC  
Cancer Family Care

Providing individual & family counseling for people affected by cancer\*

at

Community Outreach Building  
7389 Turfway Road  
Florence, KY 41042
